

Bicycle Turning Movement Count Form

Your Name: _____ Location: _____

Date: _____ Weather: _____

Start Time: _____ End Time: _____

Please fill in your name, count location, date, time period, and weather conditions (fair, rainy, very cold). Count all bicyclists crossing through the intersection. If a bicyclist uses the crosswalks, mark counts in the crosswalk boxes. If a cyclist crosses at more than one crosswalk, draw a square around the 2nd (or 3rd or 4th..) crossing. If you have time, count pedestrians in the pedestrian boxes.

- Count the number of people on the bicycle, not the number of bicycles.
- Use one data count form for each 15-minute interval.
- Draw north arrow and indicate street names on sketch.
