The X-Files: V2X and Active Transportation

Stephen Fickas (Computer Science, UO)
Marc Schlossberg (Sustainable Cities Initiative, UO)

Objectives

- Bring active transportation into the Vehicle to Everything (V2X) mix.
- Until next-generation smart-controllers become ubiquitous, provide a simple means to extend current equipment.
- Link into the real-time grid-feed to benefit active transportation.
- Provide a V2X entry-ramp for CTE projects in our local schools.

First Demonstration: Virtual Call Button

Second Demonstration: Green Wave
